

SOUTH-WEST STATE OF SOMALIA

Second Phase Health Sector Strategic Plan 2017 – 2021

SOUTH-WEST STATE CHAPTER

FOREWORD BY THE MINISTER

The South West State Ministry of Health is committed to the realization of the strategic objectives set out in this chapter. These policy priorities, strategic objectives and goals have been developed in close coordination with our international partners and with consultations with the relevant technical experts and program managers. This approach was taken to ensure that the Second Phase Health Sector Strategic Plan (HSSP II) 2017-2021 becomes an actionable guide for the annual work plans of the Ministry of Health.

This chapter has also been developed to be consistent with the National Development Plan 2017-2019 and the health component of the South West State Strategic Plan 2017-2020. The government of South West State has now moved into the implementation phase of the state-wide strategic plan. It is our aim that the HSSP II guides the necessary actions to achieve the targets set out in the ongoing national development planning exercises.

The South West State Ministry of Health is committed to harnessing all available resources to support the implementation of the HSSP II and commits to ensure an enabling environment to facilitate the implementation of this second phase of HSSP II.

Sincerely,

Honourable Isak Ali Subag
Minister, Ministry of Health
South West State of Somalia

ACKNOWLEDGMENT BY THE DIRECTOR GENERAL

I would like to express gratitude to all those who were involved in this process to develop this second phase of the Health Sector Strategic Plan 2017-2021. The South West State Ministry of Health has worked closely with many partners, consultants, technical experts, and staff to compile the information contained in the following chapter. This plan will serve as the foundation of the further improvement of health service delivery in South West State.

It is our aim that HSSP II will become the basis for the actions that will allow the Ministry of Health to grow as a new organization to become fully active in all regions and districts of the state. I would like to thank the Federal Ministry of Health for their leadership in developing such a comprehensive document. I would like to specifically recognize the practicality of including state focused chapters to delve into the specific needs at the sub-national level and welcome this approach as particularly valuable.

Finally, I would like to acknowledge the technical support provided by IRIS Consulting Firm and the World Health Organization in providing the financial and technical support necessary for the development of HSSP II.

Isaak Mohamud Mursal
Director General, Ministry of Health
South West State of Somalia

INTRODUCTION/BACKGROUND

The Health Sector Strategic Plan will be guided by the National Development Plan 2017-2019 and the related South West State Strategic Plan 2017-2020. The South West State Strategic Plan has entered into the implementation phase; this Health Sector Strategic Plan will be consistent with the implementation plan currently under development.

The South West State of Somalia was established on ISWA was formed 2014 in Baidoa, Baay Region, Somalia. The Administration consists of the following regions: Baay, Bakool and Lower Shabelle. The current president, Sharif Hassan Sheikh Adan, was elected to a four year term on November 17, 2014. With a population of approximately 2.4 M people (2014 estimate), South West State is an autonomous constituent state of the Federal Republic of Somalia. Its political borders are defined by the three regions of Bay, Bakool and Lower Shabelle, positioning the state in the south-central part of the country and strategically located between the Jubba and Shabelle rivers. The state shares boundaries with Gedo, Middle Jubba, Hiiraan and Benadir regions in addition to Ethiopia. According to available data estimates the population – 20% of the total population of Somalia as a whole – is composed of 55% nomadic pastoralists and 19% agro-pastoralists, with the remaining 26% being urban dwellers.

This area is traditionally very rich in Agriculture, Livestock and Fisheries, but the lack of security and poor infrastructure has meant that the population has been unable to cultivate the fertile land. Over the past decades the state has thus been hard hit by recent and recurrent droughts, with Baay and Bakool being the epicentre of the 1992 and 2011 famines, and led to Baidoa being renamed from “Paradise” to the “City of Death”. In 2010 to 2011, a lack of physical security and access caused by Al Shabab obstructed both Humanitarian actors and the Somali Government from supporting the famine affected population in Southern Somalia. Most of the victims affected by this famine were from South West State.

Current drought affected displacement of the rural population is widespread; with more than 180 IDP settlements are in Baidoa, some of which have been in place for many years. Many have fled their homes seeking water, food, and health services, only to reach locations with little or no resources available upon arrival. There have been numerous health complications due to the high concentration of unvaccinated children and adults in urban centres across the state.

The Ministry of Health has been actively responding to epidemics and coordinating the emergency response, in collaboration with other departments and sectors. In addition to the emergency response, the Ministry of Health has developed a decentralized service delivery model to improve health outcomes and ensure equitable access to good and affordable healthcare including nutrition services.

STRATEGIC DIRECTIONS

The vision, mission, goal, values and principles are derived from the Somali Health Policy and the National Development Plan for the Federal Government of Somalia. They intend to contribute to the achievement of the national development goals as well as the realization of the health related SDGs.

Vision

All people in Somalia enjoy the highest possible health status, which is an essential requirement for a healthy and productive nation.

Mission

Ensure the provision of quality essential health and nutrition services for all people in Somalia, with a focus on women, children, and other vulnerable groups and strengthen the national and local capacity to deliver evidence-based and cost-effective services based on the EPHS and Primary Health Care Approach.

Goal

Improve the health status of the population through health system strengthening interventions and provide quality, accessible, acceptable and affordable health services that facilitate moving towards UHC and accelerate progress towards achieving the health related SDGs.

Targets

- ✓ By 2021, reduce maternal mortality ratio from 732/100,000 in 2015 to less than 400/100,000
- ✓ By 2021, reduce <5 mortality rate from 137/000 in 2015 to less than 100/1000 live births
- ✓ By 2021, reduce Infant mortality from 85/000 in 2015 to less than 70 per 1000 live births
- ✓ By 2021, reduce neonatal mortality from 40/000 in 2015 to less than 35 per 1000 live births
- ✓ By 2021, reduce the number of children who are stunted by 15% from 12%
- ✓ By 2021, reduce incidence of TB from 285/100,000 per year to less than 250/100,000
- ✓ By 2021, increase the coverage of Pent 3 from 43% to 80%
- ✓ By 2021, increase skilled birth deliveries from 33% to 55%
- ✓ By 2021, reduce child wasting from 14% to less than 10%
- ✓ By 2021, increase contraceptive prevalence rate (CPR) to >15%
- ✓ By 2021, increase TB case detection rate from 42% to >70%
- ✓ By 2021, increase in per capita expenditure on health from ~\$12 per person per year in 2015 to \$23 per person per year; with share of Government Health Expenditure (GHE) increased to 12% of the total expenditure on health through public sector.

Strategic Objectives

The strategic objectives are meant to improve and strengthen the functions of the national health system to respond to the following performance criteria:

1. Access to health services (availability, utilization and timeliness)
2. Quality of health services (safety, efficacy and integration)
3. Equity in health services (disadvantaged groups)
4. Efficiency of service delivery (value for resources)
5. Inclusiveness (partnerships)

The inputs required to influence the above performance criteria form the basis for the overall and specific objectives for HSSP II. These inputs correspond to the broad health policy objectives and national development plan. The objectives for the HSSP II are thus given under the following nine building blocks discussed in subsequent chapters of the Plan:

- ✓ Scaling up of essential and basic health and nutrition services (EPHS)
- ✓ Overcoming the crisis of human resources for health
- ✓ Improving governance and leadership of the health system
- ✓ Enhancing the access to essential medicines and technologies
- ✓ Functioning health information system
- ✓ Health financing for progress towards Universal Health Coverage
- ✓ Improving health sector physical infrastructure
- ✓ Enhancing health emergency preparedness and response
- ✓ Promoting action on social determinants of health and health in all policies.

Core Values and Principles

The following values and principles provide the basis for the Second Phase Health Sector Strategic Plan (HSSP II):

1. Universal and equitable access to acceptable, affordable, cost-effective, and quality health services with maximum impact on Somali populations' health to ensure the realization of the right to health
2. Effective, transparent and accountable governance and leadership in managing the different components of the health system with decentralized management of health care service delivery
3. Building effective collaborative partnerships and coordination mechanisms engaging local community, national and international stakeholders and pursuing the aid effectiveness approaches
4. Good quality services - well managed, sensibly integrated, available, accessible, accountable, affordable and sustainable (with a corresponding reduction in vertically-driven, standalone programmes and projects)
5. Priority emphasis on reproductive, maternal, neonatal, child and adolescent health.
6. Promotion of healthy lifestyles and health-seeking behaviour among the population.
7. Emphasis on prevention and control of priority communicable and non-communicable diseases, as well as on trauma and related injury
8. Addressing the special needs of vulnerable groups, rural and pastoral communities
9. Evidence-based interventions based on considered use of reliable health information
10. Meaningful engagement and participation of citizens in the management and financing of the health services
11. Increased and more diverse public-private partnerships

Implementation of health financing systems that promotes equitable access to priority health services.

POLICY PRIORITIES FOR 2017-2021

This section covers the nine strategic areas reflected in the Somali Health Policy 2014 discussed in the subsequent nine chapters:

1. **Service delivery:** Scaling up of essential and basic health and nutrition services (EPHS)

2. **Human resources for health:** Overcoming the crisis of human resources for health
3. **Leadership and governance:** Improving governance and leadership of the health system
4. **Medicines, medical supplies and technologies:** Enhancing the access to essential medicines and technologies
5. **Health information system:** Functioning health information system
6. **Health financing:** Health financing for progress towards Universal Health Coverage
7. **Health infrastructure:** Improving health sector physical infrastructure
8. **Emergency preparedness and response:** Enhancing health emergency preparedness and response
9. **Social determinants of health:** Promoting action on social determinants of health and health in all policies.

These strategic areas are meant to improve and strengthen the functions of the national health system to respond to the performance criteria identified in the previous section (access, quality, equity, efficiency and inclusiveness).

As noted in section three above, EPHS intervention areas, led and managed by the Federal and State Ministries of Health, will provide all operational dimensions of HSSP II, with the aim of enhancing synergy and improving efficiency. The EPHS provides a comprehensive list of services to be offered at five levels of the health system (community, the primary health unit, health centre, referral health centre and hospital). The criteria for defining EPHS services are impact, cost-effectiveness and equity.

I. HEALTH SERVICE DELIVERY

Table 1: SWOT Analysis on HEALTH SERVICE DELIVERY

STRENGTH	WEAKNESS	OPPORTUNITY	THREAT
<ol style="list-style-type: none"> 1. Two of the three regional hospitals are functioning. 2. Of 9 district level hospitals, 2 are functioning. 3. 105 health centres/MCHs provide basic services through the state, in addition to 45 PHU units. 4. 10 TB centres are functional in the state and provide DOTS. 5. HIV services are available, including 2 VCT sites and 1 ARV site. 6. Mobile teams provide basic health 	<ol style="list-style-type: none"> 1. There is no supportive supervision carried out by respective health authorities at state, region and district levels. 2. Essential Public Health Services (EPHS) are inactive in all regions and districts 3. Quality of the services provided is relatively poor. 4. Integration of the health and nutrition services in the EPHS health facilities is lacking. 5. 3 of the 18 districts do not provide C/S and lack blood transfusion services. 6. Majority of communities in rural and remote areas have no access to basic health services. 7. Access to VCT, ART and TB services are extremely limited. 	<ol style="list-style-type: none"> 1. Existing state institutions are keen to deliver basic services. 2. AMISOM troops helping to restore the peace and security in the State. 3. Flourishing private health sector with potential to complement public services. 4. Development partners willing to contribute to the provision of basic health and nutrition services. 5. The existing non-operational district hospitals in the state can be equipped and operationalized 	<ol style="list-style-type: none"> 1. Insecurity challenging access to healthcare services. 2. Recurrent droughts 3. Disease epidemics

<p>and nutrition services.</p> <p>7. EPI outreach campaigns are periodically carried out to reach rural and hard-to-reach areas.</p>	<p>8. There is poor referral system functioning across the State.</p> <p>9. All 3 regions have limited access to basic healthcare services.</p> <p>10. There is a lack of utilization and awareness of the available health services across the state.</p> <p>11. No functioning state level laboratory.</p>	<p>6. There are functioning training institutions, such as the midwifery school.</p>	
--	--	--	--

1.2 Policy Priorities for Health Service Delivery

Goal

Reduce maternal, neonatal and child mortalities and improve access to essential health services of acceptable quality, prevent and control communicable and non-communicable diseases and improve quality of life.

Strategic Objective 1: To increase access to and utilization of cost-effective, quality and gender-sensitive health services, particularly for women, children, and other vulnerable groups in South-West State by 2021.

Priority Strategies

- 1.1 Consolidate and scale up EPHS delivery in all regions and districts in South-West in a phased approach.
- 1.2 Provide adequate and equipped ambulances to all hospitals and referral health centres in South-West.
- 1.3 Provide integrated comprehensive outreach/mobile health services to hard-to-reach populations in remote and rural areas in South-West.
- 1.4 Scale up high impact nutrition interventions including management of malnutrition, micro-nutrient supplementation, infant and young child feeding promotion and food fortification in all regions and districts of South-West.
- 1.5 Implement National Malaria Prevention and Control Strategy, including indoor residual spraying (IRS), impregnated treated nets (ITN) distribution, Intermittent Preventive Therapy in Pregnancy and prompt and effective treatment services in malaria prone areas in South-West.
- 1.6 Implement National Tuberculosis Control Strategy, including provision of high quality Directly Observed Treatment Short-Course (DOTS) and control of multi-drug resistant TB with focus on high risk groups in all regions and districts of South-West.
- 1.7 Implement the National HIV/AIDS Prevention and Control Strategy with expanded access to HIV/AIDS prevention and treatment services including antiretroviral therapy (ART) services for adults and children, sexually transmitted infection (STI) control, prevention of mother-to-child transmission of HIV (PMTCT) and provision of safe blood in all regions and districts in South-West.
- 1.8 Implement the National Mental Healthcare Strategy and Programme to provide comprehensive, integrated and responsive mental healthcare services in a phased approach across South-West.
- 1.9 Implement the state-wide communication strategy and programme to create demand for services and promote health seeking behaviours of the population in South-West.

Strategic Objective 2: To enhance and ensure quality and safety of healthcare services by 2021.

Priority Strategies

- 2.1 Implement service standards, technical tools, guidelines and protocols developed by the Federal MOH in all health facilities in line with the EPHS.
- 2.2 Ensure all health centres, referral health centres and hospitals have the specified standard packages for diagnostic and radiology services in line with the EPHS framework.
- 2.3 Disseminate quality assurance framework and clinical guidelines developed by Federal MOH to all health facilities in South-West State.
- 2.4 Develop and implement annual calendar of joint supportive supervision across the State of South-West.

Strategic Objective 3: *To improve, integrate and expand community based health services by 2021.*

Priority Strategies

- 3.1 Implement the community-based health strategy and provide evidence-based community interventions.
- 3.2 Reinforce the role and contributions of the district health boards and strengthen their operational capacities.

Strategic Objective 4: *To improve and expand the capacity of laboratory and blood transfusion services.*

Priority Strategies

- 4.1 Disseminate national laboratory and blood transfusion services policy to all laboratory centres and stakeholders in the State.
- 4.2 Provide in-service training of relevant staff at all levels to improve laboratory services (new technologies and scaling up new interventions).
- 4.3 Establish appropriate coordination and management within MOH at State and Regional levels to ensure effective coordination and supervision of laboratory services.
- 4.4 Strengthen the capacity of the blood bank through expansion and upgrading of facilities and ensure adequate supplies for blood collection and storage in all regions in South-West.
- 4.5 Educate and sensitize communities and prospective donors on blood safety.

2. HUMAN RESOURCE FOR HEALTH

Table 2: SWOT Analysis Human Resource for Health.

STRENGTH	WEAKNESS	OPPORTUNITY	THREAT
----------	----------	-------------	--------

<ol style="list-style-type: none"> 1. Leadership and management staff in place. 2. 1 health training institution is functioning; the Midwifery training school. 3. Minimum staffing in public health facilities in line with EPHS. 4. Salary scale for health workers in health facilities in line with EPHS 5. Periodic on-the-job training and refreshment courses provided to the health workers. 6. Existence of national HR policy and related guidelines, although not cascaded to the state. 	<ol style="list-style-type: none"> 1. There is no human resource management and development unit in place. 2. All health workers are not on the Government Payroll. 3. Irrational distribution of health workers (over 90% stationed in urban centres). 4. Lack of key cadres such as pharmacist, lab technologist, radiologist, Psychiatrics etc. 5. HR records are not available (no HRIMS). 6. Lack of community-based health training institutions in the state. 7. Health professionals in the state are not registered or licensed. 	<ol style="list-style-type: none"> 1. National HR Policy and strategic plans can inform state-level policy and planning. 2. Private health training institutions are on the rise. 3. Health professionals in Diaspora willing to return and transfer their skills to local health workers. 4. Junior health professional graduates are on the rise in the state 	<ol style="list-style-type: none"> 1. Personal security challenging staff to operate in the urban and rural areas 2. Budget constraints
---	--	---	---

1.2 Policy Priorities

Goal

Develop a workforce that addresses the priority health needs of the Somali population, which is adequate in number, well trained, equitably distributed and motivated to provide quality, essential, non-discriminatory health services.

Strategic Objective 1: To improve the planning, development and management of human resource for health by 2021.

Priority Strategies

- 1.1 Establish human resource management unit at State MOH readied with necessary equipment and facilities.
- 1.2 Implement staff for health policy and strategy to guide the planning, development and management of the human resources for the health sector in South-West.
- 1.3 Undertake inventory of all health workers disaggregated by sex, location, seniority, qualification and make projections for the next 10 to 15 years in conjunction with the national exercise.
- 1.4 Develop and implement staff recruitment and retention plan including special packages for hard to reach areas.
- 1.5 Conduct comprehensive and systematic training needs assessment for all cadres at all levels in conjunction with the national training needs assessment.
- 1.6 Develop and implement a comprehensive training plan based on the results of the needs assessment aligned with the national training master plan.

- 1.7 Support the establishment of health professional associations for all cadres in the State linked to the Federal health professional associations.

Strategic Objective 2: *To enhance and upgrade the institutional capacity for human resources for improved performance and productivity of the sector by 2021.*

Priority Strategies

- 2.1 Deploy adequate numbers of health professionals to ensure that 80% of health facilities have skilled staff to meet the minimum staffing requirement to deliver EPHS.
- 2.2 Establish an integrated HR information system as part of the HMIS and keep the human resource management information system (HRMIS) regularly updated.
- 2.3 Create human resource management positions and recruit appropriately skilled personnel in to occupy HR management positions at state, regional, district and health facility level.

Strategic Objective 3: *To enhance capacity and relevance for training maintained of health workers to provide fair, equitable and non-discriminatory services, in partnership with the private sector and other stakeholders by 2021.*

Priority Strategies

- 3.1 Establish multi-disciplinary health training institution in the state accredited by national health professionals' council to start the intake for key cadres.
- 3.2 Develop a plan for the development of health workers, based on projected HR needs, both in number and skill-mix aligned to national human resource development plan.
- 3.3 Provide appropriate and coordinated training of community health workers, in order to mitigate the shortages of health workers and scale up health promotion at the community level.
- 3.4 Implement on-the-job training, mentorship and skills development programme to improve the technical and managerial skills of health workers and managers.

3. LEADERSHIP AND GOVERNANCE

Table 3: SWOT Analysis Leadership and Governance.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
1. State MOH is in place and functioning. 2. Regional health management teams exist in 3 regions. 3. District health management teams exist in 10 out of	1. Irregular and ad-hoc health and nutrition sector coordination meetings. 2. Lack of leadership and management capacity building plan and support at all levels. 3. Policies, laws and standards set at national level are not	1. Unified Somali health policy 2. More interest and support to the health sector by development partners.	

Eighteen districts in the state.	cascaded and adopted at the state level.	3. Political commitment from the State Government to support the health sector.	
4. District health boards exist in four districts.	4. Ambiguities on roles and responsibilities between Federal MOH and State MOH.	4. Federal constitution devolves functions of planning, budgeting and service delivery to states.	
5. Legal framework and policies put in place	5. Some Partners operate without signing a MOU with State MOH.		
6. Minimum health and nutrition sector coordination forums.	6. Regulations to govern private health sector are not place.		
7. Institutional Operation structures developed	7. South-West State MOH has no regular seat or role in the health sector coordination forums.		
8. Establishment of MoUs/Agreements signed with potential partners	8. District health boards exist in only four districts.		

3.2 Policy Priorities

Goal

Strengthen the leadership, governance, institutional and management capacity of the health sector to deliver efficient and effective health programmes and services

Strategic Objective 1: *To enhance and strengthen the governance, leadership and management systems and capacity at the state, regional and district level by 2021.*

Priority Strategies

- 1.1 Implement the leadership and management capacity building plan developed by the Federal MOH in line with the updated functions, roles and responsibilities
- 1.2 Implement the health facility governance and management framework developed by Federal MOH at all levels (PHU, HC, RHC, Hospitals).
- 1.3 Strengthen citizen and civil society engagement and accountability in management and review of health services through the establishment of community health boards ensuring meaningful involvement of women and other vulnerable groups.

Strategic Objective 2: *To enhance and strengthen sector planning, monitoring and supervision system from state level to district level by 2021.*

Priority Strategies

- 2.1 Develop annual plans (consolidated plan from districts and regions) inclusive of all actors (Government, Civil Society, Private Sector, Development Partners, Academic and Training Institutions, etc).
- 2.2 Conduct systematic and regular supervision, monitoring, review and evaluations including meaningful involvement of service users and communities including hard-to-reach areas.
- 2.3 Undertake joint review missions, based on national calendar and organize annual health review summit in the state to discuss the joint review mission findings and recommendations.

Strategic Objective 3: *To enhance coordination and ensure alignment of humanitarian and development assistance with state priorities by 2021.*

Priority Strategies

- 3.1 Strengthen capacity of coordinating structures at state, region and district levels.
- 3.2 Organize regular health and nutrition sector coordination meetings at State and regional levels.
- 3.3 Monitor and report the effective implementation of Somalia health sector partnership compact.
- 3.4 Implement national policy and guidelines for Public-Private Partnership based on health sector compact to ensure long-term sustainability of the health system.
- 3.5 Ensure the common management approaches are persevered by all partners, covering procurement, disbursement and accounting of funds, and joint reviews of health sector performance in line with agreed Partnership Principles between federal government and development partners.

4. MEDICINE AND SUPPLIES

Table 4: SWOT Analysis Medicine and Supplies.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
<ul style="list-style-type: none"> 1. Small regional warehouse. 2. Emergency supplies (buffer stocks for health and WASH) 3. NGO managed regional cold-chains/cold rooms. 4. Standard treatment guidelines 5. Updated essential drug list 6. Medicines and supplies procured by private entities. 	<ul style="list-style-type: none"> 1. There is no state level supply management unit 2. There is no central state warehouse to manage the storage and distribution of supplies. 3. Regional warehouses are very small and congested and lack the basic equipment and facilities. 4. Essential medicine and supplies are frequently out of stock. 5. There is no state level supply chain master plan. 6. Standard treatment guidelines 7. Regional cold-chains are managed by INGOs. 8. There is no system to record and report medicines and supplies (no LMIS at state level). 9. There is no quality control system or laboratory to ensure the quality of the medicine and supplies. 	<ul style="list-style-type: none"> 1. Seaport and airports in the state that can facilitate supply shipments. 	<ul style="list-style-type: none"> 1. Unregulated private suppliers. 2. High volume of counterfeit drugs. 3. Lack of predictability of medicines and supplies procured by humanitarian and development partners leading to frequent shortages and stock-outs.

3.2 Policy Priorities

Goal

Ensure the availability of essential health supplies, medicines, vaccines and commodities that satisfy the priority needs of the population, in adequate amounts, of assured quality and at a price that the community and the health system can afford.

Strategic objectives:

Strategic Objective 1: *To improve access to good quality, efficacious, safe and affordable medicines, medical supplies and equipment, vaccines and health technologies by 2021.*

Priority Strategies

- 1.1 Construct/expand/rehabilitate and equip State Medical Stores (SMS) Regional Medical Stores (RMS), and Hospital Stores to ensure proper storage and handling of medicines, medical supplies and equipment, vaccines and health technologies.
- 1.2 Provide adequate and appropriate drugs, equipment and medical supplies (ensure that facilities have at least 80% of identified tracer essential drugs in stock all year round).
- 1.3 Introduce drug revolving programme to address the frequent shortages of medicines and medical supplies and equipment, and health technologies in the public sector in line with the national essential medicine policy.
- 1.4 Provide regular training and career development opportunities to upgrade the skills of health workers and pharmacists.
- 1.5 Implement regular supervision and inspection for both public and private health services in the area of supply management.
- 1.6 Introduce and maintain effective logistic management information system in all public health facilities in the State.
- 1.7 Implement appropriate stock control system at all levels.

Strategic Objective 2: *To improve, advance and strengthen the medicines regulations and quality assurance system by 2021.*

Priority Strategies

- 2.1 Implement the code of ethics and a code of conduct for pharmacy practice; guidelines and standard operating procedures for medicines inspection, medicines registration, pharmaco-vigilance and quality control analysis to be developed by Federal MOH.
- 2.2 Establish quality control mechanism in main ports and cross-border areas of the State.
- 2.3 Monitor and report adverse drug reactions.

Strategic Objective 3: *To promote rational and cost effective use of medicines at all levels of the health care delivery system by 2021.*

Priority Strategies

- 3.1 Establish a unit in charge for pharmaceutical services (rational medicine use, drug information and sensitization).
- 3.2 Establish medicine information centres and therapeutic committees at secondary health facilities.
- 3.3 Undertake consumer sensitization on the rational use of medicines.

5. HEALTH INFORMATION

Table 5: SWOT Analysis Health Information.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
<ol style="list-style-type: none"> 1. Three regional HMIS officers operate in state 2. Health facility reporting rate is 60%. 3. Around 50% of health facilities submit complete and timely reports. 4. Recording and reporting tools are readily available in health facilities. 5. Health workers have basic skills in managing data. 6. Basic mapping of health facilities, though not comprehensive and complete. 7. MoH Standard registers produced for health centres across the state. 8. On line DHIS2 were introduced at regional level 	<ol style="list-style-type: none"> 1. There is no state level HMIS unit or dedicated officer. 2. State doesn't oversee or control the data collection and reporting from health facility to the region and from the region to the state and vice-versa. 3. HMIS tools (registers, patient cards, monitoring charts and reporting forms) are in the hands of implementing partners. 4. Analytic reports are not generated and published (only aggregated raw data is collected by IPs). 5. Information generated is not used for planning and decision making. 6. There is no proper demarcation of catchment areas of health facilities and target population not estimated. 7. All public health facilities (public and private) in the state are not mapped and their database not readily available in the state. 8. There is no data verification, quality assurance and feedback system at all levels. 9. Health workers and managers in the state have limited or no skills in data management and information use. 10. There is no district health management information system. 11. There are challenges of the timeliness and completeness of the reports. 12. There is no unified reporting system 13. No unified Field Manuals for SoPs among partners 	<ol style="list-style-type: none"> 1. New plans are underway introducing DHS2 in all districts of the state. 	

5.2 Policy Priorities

Goal

Establish effective health management information system based on sound, accurate, reliable, disaggregated and timely information for evidence based planning and implementation, supported by effective monitoring and evaluation and by targeted research.

Strategic Objective 1: *To enhance and strengthen the institutional framework for implementing a functional health management information system by 2021.*

Priority Strategies

- 1.1 Establish and strengthen the capacity of HMIS units at State, Regions and Districts.
- 1.2 Rollout the introduction of DHIS 2 in phased approach in all districts of the State.
- 1.3 Implement HMIS standards, guidelines and standard operating procedures (SOPs) for the data collection, analysis, and reporting developed by the Federal MOH.
- 1.4 Establish a forum to discuss and coordinate HMIS related issues at State level.

Strategic Objective 2: *To improve routine data collection quality, management, dissemination and use at all levels by 2021.*

Priority Strategies

- 2.1 Establish an integrated HMIS portal for dissemination of all available data and meta-data resources linked to national HMIS portal.
- 2.2 Ensure the integration of reporting systems into the routine health management information system, including disaggregation by sex, location and other factors.
- 2.3 Provide training and career development opportunities for HMIS staff.
- 2.4 Provide on-the-job training, mentorship and coaching for health workers to follow HMIS standards, guidelines and SOPs for data collection, analysis and reporting.
- 2.5 Produce quarterly and annual health statistics for both operational and strategic management.
- 2.6 Undertake advocacy for policy makers, planners and implementers for use of health data in planning and decision making at all levels.
- 2.7 Provide information communication technology (ICT) to HMIS units and health facilities and increase access and use of ICT technology for health management information system.
- 2.8 Implement the plan for vital registration system (birth and death) in phased approach across the state.

Strategic Objective 3: *To enhance early warning and integrate disease and nutrition surveillance systems into national HMIS by 2019.*

Priority Strategies

- 3.1 Strengthen integrated disease surveillance and response (IDSR) information system.
- 3.2 Strengthen nutrition surveillance system.

3.3 Pilot community-based IDSR and nutrition surveillance and rollout to all districts in a phased approach.

6. HEALTH FINANCING

Table 6: SWOT Analysis on Health Financing.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
1. Health financing strategy in place at national level, but not cascaded to the state. 2. Community and Diaspora contributions in the form of user-fees and grants (both in kind and cash) 3. Continued Donor funding	1. Lack of Government budget to the health sector. 2. There is no dedicated unit in charge for health financing. 3. There is no system to account or monitor the financing and budgeting processes at state level. 4. Lack of running costs for state MOH. 5. There is no system or strategy to raise local resources. 6. No federal government subsidies on health issues 7. Leadership and Governance allocated budget are not utilized in the state level system	1. Public financial reform under development with the support of World Bank. 2. Development & humanitarian aid.	1. High donor dependency 2. Unpredictable donor financing

6.2 Policy Priorities

Goal

Create sustainable health financing system, which relies national financing and local resources, protects the poor from catastrophic health expenditure, ensures universal health coverage, allocates budget to priorities, accounts for spending accurately, and uses national and international funds more efficiently through SWAP.

Strategic Objective 1: *To secure adequate level of funding needed to achieve national health and health related sustainable development goals by 2021.*

Priority Strategies

- 1.1 Implement pro-poor healthcare financing policy and implementation strategy (including development of clear criteria for determining vulnerability) to be developed by Federal MOH.
- 1.2 Undertake series of advocacy and lobbying to increase State Government allocation to health sector to at least 8% by 2021.
- 1.3 Advocate for the introduction of dedicated taxes for health (e.g. on Khat, Tobacco, Cosmetics, Cell phones) to ensure that at least 10% of national budget is allocated to health sector.

- 1.4 Introduce sound, efficient and effective financial and procurement management systems for the health sector.
- 1.5 Institutionalize sub-national health accounts to track flow of financial resources across the State.

Strategic Objective 2: *To ensure equitable and efficient allocation and use of health sector resources at all levels by 2021.*

Priority Strategies

- 2.1 Establish healthcare financing unit at State MOH.
- 2.2 Implement equitable needs-based criteria for allocating financial resources to be developed by Federal MOH.
- 2.3 Harness the NGO and private sector resources through contractual arrangements in pursuit of South-West health sector development goals.

7. HEALTH INFRASTRUCTURE

Table 7: SWOT Analysis on Health Infrastructure.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
<ol style="list-style-type: none"> 1. Mapping of health facilities concluded even though not accurate and complete. 2. 12 hospitals, 105 health centres, 45 PHU across the region. 3. Facility blue print in place to guide the construction of new health facilities. 4. 7Ambulances are available in the state 5. 1 Mental hospital in the state 	<ol style="list-style-type: none"> 1. MOH has no adequate office space to operate in. 2. No warehouses available at State and lower levels to store and manage medicines and supplies. 3. The physical conditions of the existing health facilities are in bad shape and not fit for the purpose of services provision. 4. There is no health infrastructure maintenance unit or workshop at State MOH. 5. Recent health facility mapping doesn't provide data on all health facilities and requires revision and updating. 6. Most of the health facilities lack the basic diagnostic and patient care equipment. 7. There is no system to maintain ambulances and other transport. 	<ol style="list-style-type: none"> 1. Existing health facilities need to re-operationalize 2. Availability of Government owned spaces for future Service exercise 3. Potential development institutions 	

7.2 Policy Priorities

Goal

Ensure the Somalia health system has the necessary infrastructure to effectively respond to the healthcare needs of the people and provide quality and accessible essential healthcare services.

Strategic Objective 1: *To enhance access to healthcare services through the establishment of network of public health facilities to support the effective delivery of EPHS at all levels by 2021.*

Priority Strategies

- 1.1 Carry out an inventory of physical infrastructure and quantify the number of health facilities to be rehabilitated during the strategic planning period taking account of diverse population needs (e.g. in relation to gender, rural isolation, disability etc) in conjunction with national health infrastructure assessment.
- 1.2 Construct/re-construct/rehabilitate health facilities in accordance with the national health facility blueprint and rationalization plan (structures, water supply, toilets, and medical waste disposal facilities) and include staff quarters for remote located and rural health facilities.
- 1.3 Elaborate a national infrastructure databank to include information on equipment and furniture, and facilities linked to national infrastructure data-bank.
- 1.4 Establish architect, engineering and infrastructure maintenance department at State MOH.

Strategic Objective 2: *To improve the institutional capacity and create conducive working environment through provision of adequate office premises, work-stations, ICT equipment and transport by 2019.*

Priority Strategies

- 2.1 Construct office premises for the state head-quarter office, regional and district health offices in phased approach.
- 2.2 Provide work-stations for the state head-quarter office, regional health offices and district offices.
- 2.3 Provide ICT equipment and transport to the state head-quarter office, regional health offices and district health offices in phased approach.

Strategic Objective 3: *To procure, install and utilize appropriate medical and diagnostic equipment within the health facilities by 2021.*

Priority Strategies

- 3.1 Conduct comprehensive needs assessment and database for medical imaging equipment in conjunction with the national exercise.
- 3.2 Procure and install new equipment based on the assessed needs.
- 3.3 Ensure availability of consumables for the medical equipment as part of the procurement of essential medicines and health supplies.
- 3.4 Recruit and train both technical and maintenance staff as required.

8. EMERGENCY PREPAREDNESS AND RESPONSE

Table 8: SWOT Analysis on Emergency Preparedness and Response.

STRENGTH	WEAKNESS	OPPORTUNITY	THREAT
<ol style="list-style-type: none"> 1. State cluster coordination mechanism in place for health, nutrition and WASH. 2. Surveillance and early warning system in place and functioning. 3. WASH cluster have buffer stock pre-positioned in State. 	<ol style="list-style-type: none"> 1. Lack of State level emergency preparedness and response plan. 2. Lack of emergency and response unit at State MOH. 3. Weak surveillance and early warning system. 4. Lack of buffer stocks to respond to health emergencies. 5. Weak of logistic capacity to immediately respond to acute emergencies. 6. Lack of trained personnel in disaster risk reduction 7. Absence of community structure for disaster risk reduction 8. Lack of preposition of medical supplies for prevention and preparedness measures 	<ol style="list-style-type: none"> 1. Health, nutrition and WASH cluster system in the State. 2. Common humanitarian fund (HRP). 3. State level Disaster Management Committee. 4. Existence of ministry of humanitarian and disaster management in the state level 5. Existence National disaster management Agency 	<ol style="list-style-type: none"> 1. Prolonged draughts. 2. Subsequent disease outbreaks. 3. Insecurity in most disaster-prone areas.

8.2 Policy Priorities

Goal

Improve the capacity of the health system to prevent, control and mitigate public health threats and emergencies

Strategic Objectives:

Objective 1: *To improve access to essential life-saving health services (quality primary and secondary health care) for crisis-affected populations aimed at reducing avoidable morbidity and mortality by 2021.*

Priority Strategies

- 1.1 Establish emergency preparedness and response unit at the State MOH readied with necessary equipment and facilities.
- 1.2 Strengthen the capacity of the health workforce to respond public health emergencies and threats.
- 1.3 Pre-position adequate essential supplies and buffer-stocks into the regions and districts for rapid response to outbreaks and other public health emergencies.
- 1.4 Train health workers in disaster risk reduction.

Objective 2: *To enhance and strengthen surveillance, early warning and disease detection to mitigate, detect and respond to disease outbreaks and other public health emergencies in a timely manner by 2021.*

Priority Strategies

2.4 Strengthen the early warning and surveillance systems for health, nutrition, water and sanitation and related sectors.

2.5 Strengthen the laboratory capacity to detect public health threats.

9. SOCIAL DETERMINANTS OF HEALTH

Table 9: SWOT Analysis on Social Determinants of Health.

STRENGTH	WEAKNESSES	OPPORTUNITY	THREAT
<ol style="list-style-type: none">1. Communication for development exists at national level.2. South-West inter-ministerial WASH steering committee in place.	<ol style="list-style-type: none">1. Inequity in access to healthcare services (EPHS services), particularly nomadic, pastoral and hard to reach communities.2. No clear guidelines for health promotion and messaging.3. Access to safe water and sanitation facilities extremely limited.4. Literacy rate is very low for adults, particularly female.5. Majority of population in South-West are below the poverty line.	<ol style="list-style-type: none">1. The national health policy emphasizes health in all policy initiative.2. Scaling up nutrition (SUN approach), can leverage efforts in preventing malnutrition in the State.	

9.2 Policy Priorities

Goal

Create social and physical environments that promote good health for all.

Strategic Objective 1: *To enhance inter-sectoral and multi-sectoral collaboration in addressing the social determinants of health by 2021.*

Priority Strategies

1.1 Establish multi-sectoral committee to spearhead the mainstreaming of health into all policies and plans of the Government at State level.

1.2 Work with State Government Ministries and Agencies to include health in all policies and plans (education, water, agriculture, environment, employment, transport, disaster management agency, etc)

Strategic Objective 2: *To promote actions in reducing the risks and vulnerabilities of the population to preventable social and environmental hazards by 2021.*

Priority Strategies

2.6 Implement an integrated school health programme including adolescent sexual and reproductive health, nutrition and hygiene promotion

2.7 Carryout regular water treatment and chlorination at household and communal water points.

- 2.8 Implement a program to promote a multi-sectoral approach to environmental health, hygiene promotion, water and sanitation.
- 2.9 Implement comprehensive communication for development strategy to strengthen health promotion and disease prevention and address the social determinants of health in the State.

CONSOLIDATED FINANCIAL PLAN

BUDGET SUMMARY

Health Services	4,636,364.36	5,454,545.64	5,454,546.09	5,181,818.09	4,500,000.00	25,227,274.18
